

CONVEX MIRROR

POLITE ENTERPRISES CORPORATION

Convex mirrors strategically placed, help avoid collisions at blind or obscured intersections. They also assist supervision of machinery or production lines, giving that extra observation point. We recommend our PEC range which features heavy duty fixtures. These convex mirrors are lightweight, shatterproof and easily installed. They are individually packed and include all fixtures plus installation instruction.

Our PEC outdoor range of convex mirrors overcome the hazards associated with obstructed and blind intersections on roads, driveways, parking lots and loading docks. This range is strong, stable and able to withstand all weather conditions without fading or cracking.
