

POLITE ENTERPRISES

Rubber Speed Hump

Product Description

Polite Enterprise Corporation's rubber speed hump is an economical alternative to more expensive models. It is ideally suited to low traffic environments such as unit and town house developments, small car parks or for short term installations. They are manufactured from a mixture of natural and recycled rubber. When laid in an alternating pattern they conform to AS2890.1:2004. Polite's rubber speed hump can also be used as a liquid bunding if installed with a sealant. e.g. Silastic.
